Sustainable Water Integrated Management (SWIM)

Support Mechanism

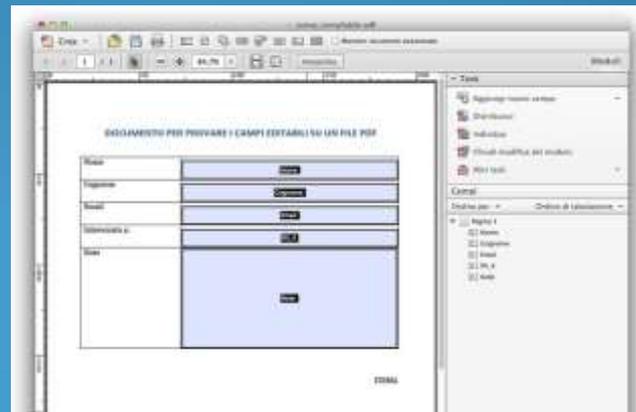

M&E SYSTEM APPLICATION TO MONITOR & EVALUATE PIM AND IMT PROCESS

Data flows between local and regional level

The hierarchical approach ensures the coherence of the system.

The WUAs operators have just to fill out a simple PDF form that generates a document to be transmitted to the hierarchically higher level for the implementation of the database.

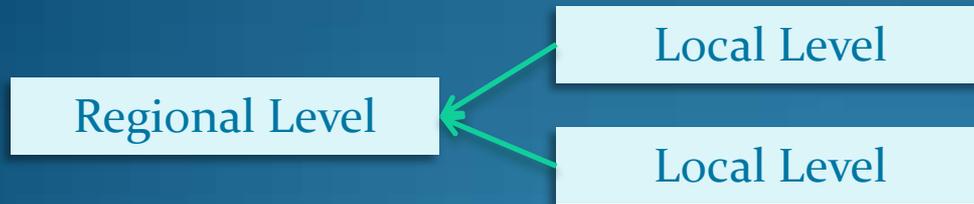

Sustainable Water Integrated Management (SWIM)

Support Mechanism

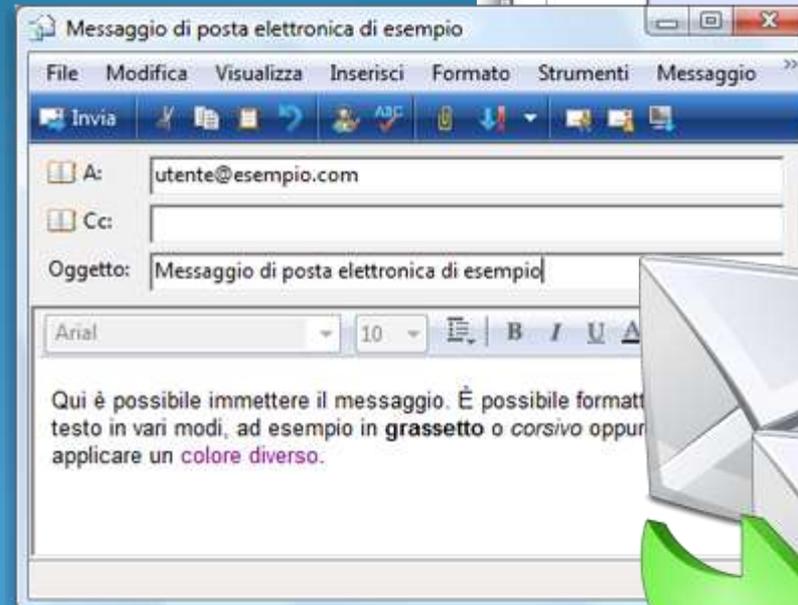

M&E SYSTEM APPLICATION TO MONITOR & EVALUATE PIM AND IMT PROCESS

Export data at the local level is done through a wizard inside the PDF file

That wizard inside the PDF file generates a file that has the name and characteristics of the local unit to which it belongs, and must be sent as it is to the unit of higher hierarchical level.

Communication is via e-mail by sending the file generated by the local units, which will be included in the regional system database using a wizard

Sustainable Water Integrated Management (SWIM) Support Mechanism

M&E SYSTEM APPLICATION TO MONITOR & EVALUATE PIM AND IMT PROCESS

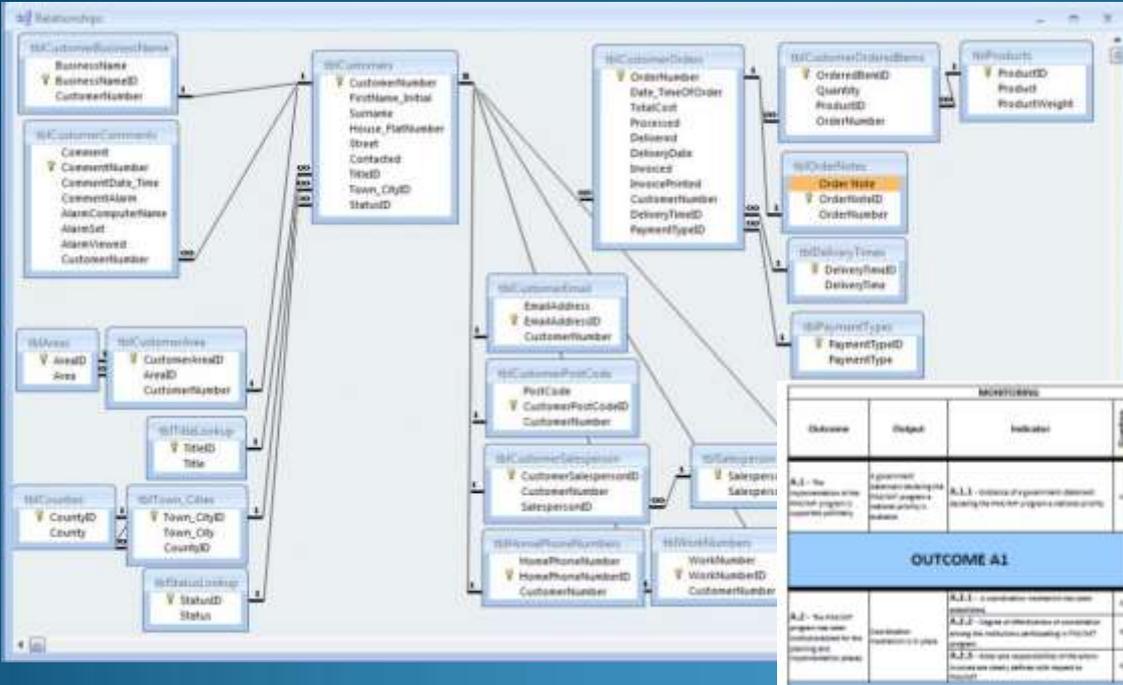

At the regional level, once you have gained access to the system, you can import the files from the local units of belonging and populate the database, by selecting the option “DATA RETRIEVE”

Once you acquired the files of a determined local unit, you cannot import another file from the same unit, otherwise it would create duplication of data, which makes the structure and outcomes unreliable

The image displays the MONEEVAS software interface. At the top, the title bar reads "MONEEVAS MAIN MENU". Below it, the user is identified as "Regional administrator" with "LOGOUT" and "QUIT PROGRAM" buttons. The main content area features the title "MONEEVAS" and the subtitle "MONitoring & EVALuation System". Underneath, a "PROGRAM SUB-SECTION" menu is shown, branching into "GENERAL SETTINGS", "DATA UPDATE", and "REPORTING". The "DATA UPDATE" section is active, showing a "TIMESSET" panel with buttons for "12", "36", and "72", and a "DATA RETRIEVE" button highlighted by a yellow arrow. Other buttons in this section include "ONCE IN THE PIM/IMT LIFE AT THE START", "ONCE IN THE PIM/IMT LIFE AT THE END", "INDICATOR GRAPH AND EXPORT", and "VARIOUS". A "Help" button and "QUIT PROGRAM" and "LOGOUT" buttons are also visible at the bottom right. In the foreground, a "Select file to import" dialog box is open, showing a file explorer view of a folder named "Nuova cartella" containing various files and folders. The "Nome file:" field is set to "E-AMOGH".

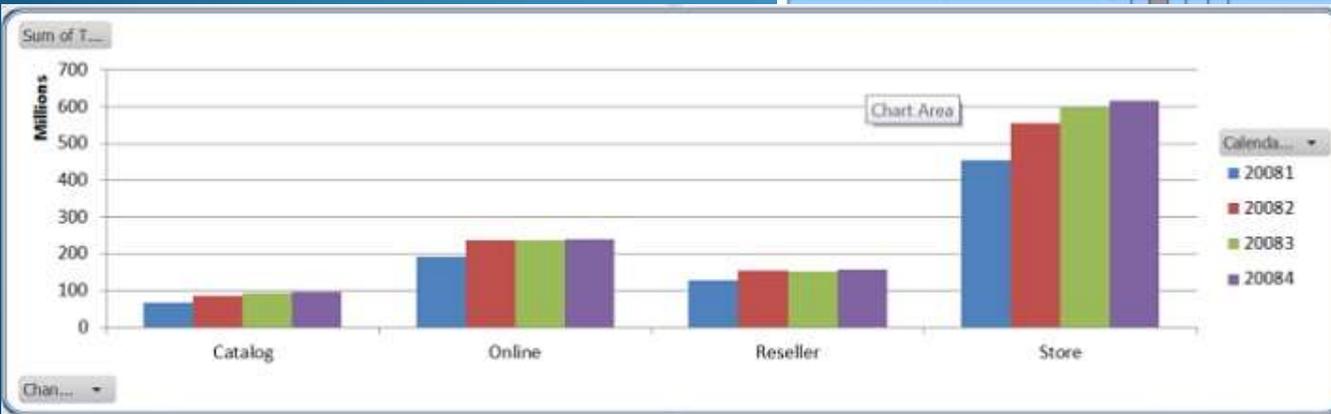

Sustainable Water Integrated Management (SWIM) Support Mechanism

M&E SYSTEM APPLICATION TO MONITOR & EVALUATE PIM AND IMT PROCESS

The system structure at the regional level contains relations and processes that integrate the data and make them viewable through reports and graphs

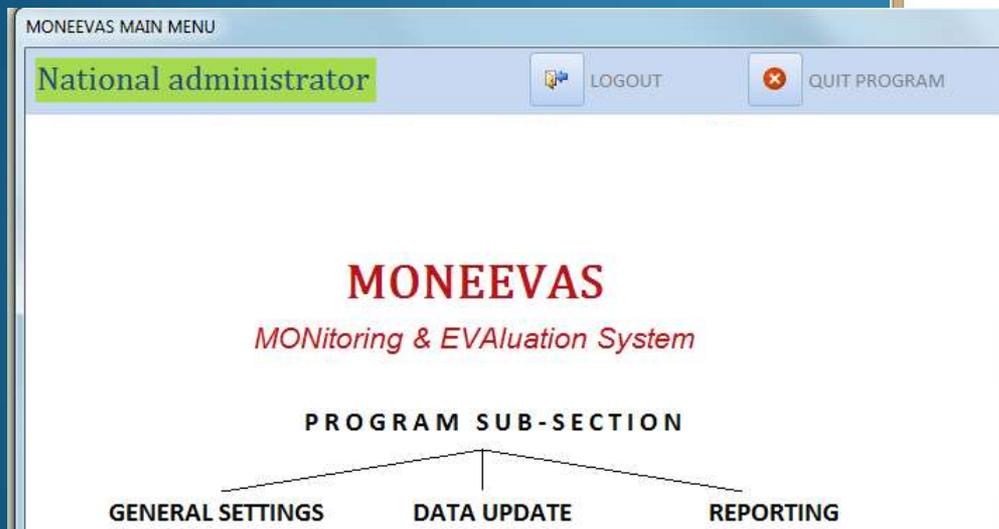

INDICATORS						EVALUATION	
Outcome	Output	Indicator	Strength	Score against Target	Trend	Notes	Comments
A.1 - To improve the implementation of the national program to combat corruption	A.1.1 - Increase of government employees declaring their assets in a national program	A.1.1 - Increase of government employees declaring their assets in a national program	++	100%	Stable		The fact that government employees declare their assets in the national program is a positive sign, but it is not clear how many employees have actually done so. The government should continue to monitor this trend and ensure that the program is fully implemented.
OUTCOME A1							
A.2 - To increase the number of people participating in the national program to combat corruption	A.2.1 - Increase of the number of people participating in the national program to combat corruption	A.2.1 - Increase of the number of people participating in the national program to combat corruption	+	75%	Increasing		The increase in the number of people participating in the national program to combat corruption is a positive sign, but it is not clear how many people have actually done so. The government should continue to monitor this trend and ensure that the program is fully implemented.

The indicator shows a positive trend in the number of people participating in the national program to combat corruption.	
A positive trend in the number of people participating in the national program to combat corruption is a positive sign, but it is not clear how many people have actually done so. The government should continue to monitor this trend and ensure that the program is fully implemented.	
The indicator shows a positive trend in the number of people participating in the national program to combat corruption.	
The indicator shows a positive trend in the number of people participating in the national program to combat corruption.	

Exporting Data from Regional to National level

Once you have finished entering data at the regional level, as in the case of the local procedure, the software installed at the regional level will export a file using a wizard

The file that will be created by the wizard is not editable, and this applies to the name, the extension and the contents
